These guidelines support the Placement and Recruitment Policy for Higher Education. They explain the process, roles and standards for campus placements, from early preparation through to post-placement support.

1. Introduction

Campus placement provides a structured bridge between higher education and employment. These guidelines set out how institutions should organise placement activity so that it is fair, transparent, well-managed and supportive of both students and employers.

2. Objective

- Ensure every eligible student has equitable access to campus placement opportunities.
- Maintain strong, transparent relationships with employers.
- Provide students with preparation, guidance and support throughout the process.
- Collect and use placement data to improve programmes and student outcomes.
- Promote ethical recruitment and responsible hiring practices on campus.

3. Scope

These guidelines apply to all placement activity organised or facilitated by a higher education institution, including on-campus drives, pool recruitment, virtual drives and off-campus drives supported by the institution's placement cell.

4. Placement Cell

Each institution must establish a Placement Cell with a designated lead, clear terms of reference and resources for employer engagement, student support and data management. The cell should include student representatives from major programme groups.

5. Employer Engagement

- Institutions must maintain a current employer register with points of contact and past recruitment history.
- Employer briefings must set expectations on eligibility, transparency, offer timelines and grievance handling.
- Institutions must not permit recruitment practices that discriminate on grounds not permitted by law or institutional policy.
- Employers must be given accurate programme and graduate profile information.
- A standard offer letter format and timeline must be agreed before a placement drive.

6. Student Eligibility and Registration

- Students must register with the placement cell before the recruitment season, typically by the start of the final year.
- Eligibility is based on academic standing, enrollment status and any specific criteria communicated by the employer.
- Students must attend mandatory preparation sessions on resume writing, interview skills and professional conduct.
- Students must disclose any existing offers where relevant to the recruitment process.

7. Placement Process

1. The Placement Cell invites employers and confirms recruitment dates, eligibility and logistics.
2. The Cell publishes the schedule and eligibility criteria to eligible students.
3. Students register for specific drives within the given window.
4. The employer conducts pre-placement interaction (presentation or briefing).
5. Shortlisted students attend interviews, tests or group discussions as defined by the employer.
6. The employer communicates offers through the Placement Cell within the agreed timeline.
7. The Placement Cell mediates offer acceptance and any clarification needed.
8. The cell follows up on joining, deferred offers and any post-placement support required.

8. Offer Management

- Offers must be communicated in writing through the Placement Cell.
- Students must respond to offers within the agreed deadline.
- Where multiple offers are received, the Placement Cell must ensure transparency on the institution's policy on dual offers.
- Employers must not withdraw offers without following the agreed process.
- Any dispute between an employer and a student is mediated by the Placement Cell before escalation.

9. Student Obligations

- Attend scheduled placement activities punctually and professionally.
- Provide accurate information in applications and interviews.
- Honour commitments made during the process, including joining dates.
- Report any concerns or difficulties to the Placement Cell promptly.
- Maintain confidentiality of employer processes and materials as appropriate.

10. Data, Reporting and Feedback

Data Item	Purpose
Number of drives and participating employers	Track employer engagement and placement capacity.
Number of eligible and participating students	Understand participation and equity of access.
Offers made and accepted	Measure outcomes and time to offer.
Student satisfaction with the process	Identify improvements to the placement experience.
Employer feedback on graduates and process	Inform curriculum and student preparation.
Post-placement tracking at 6 months	Assess career start quality and identify support needs.

11. Appeals and Grievances

Students with placement-related grievances should raise them with the Placement Cell in the first instance. Unresolved issues may be escalated to the institution's student grievance committee. The placement grievance process must be published and accessible.

12. Contact and Support

For placement queries, students should contact their institution's Placement Cell. Institutions may seek guidance from the Higher Education Department's career services coordination cell on policy interpretation, employer engagement and data reporting.
