

Skill Enhancement Policy — Annexure A

Document Type	Annexure	Reference Record	te-pol-2026-078
Department	Technical Education	Reference	TE/POL/2026/078
Year	2026	Status	Active

Demo / Synthetic Document: This document was created solely for demonstration of the HEIRS project. It is not an official government order, regulation, policy, scheme, or legal document. All content is synthetic and presented only for project presentation purposes.

Annexure A of the Skill Enhancement Policy for Higher Education provides templates and indicators to guide implementation. It includes a module planning template, an assessment rubric, minimum centre requirements, an outcomes reporting table and reference to national skill qualifications.

A. Module Planning Template

Institutions use this template to propose a skill module for approval. One template is completed per module.

Field	Guidance for Completion
Module title	Short, descriptive name of the skill module.
Competency statement	What a certified student can do; one or two sentences.
Level	Foundational / Domain / Vocational with indicative level.
Duration and credits	Contact hours, self-study and credit value if applicable.
Target cohort	Programmes and year(s) for which the module is intended.
Industry input	Partnering body and its role in design or assessment.
Assessment method	Practical, project, portfolio, test or combined approach.
Certification	Awarding arrangements and any national qualification alignment.
Resources required	Facilities, equipment and faculty needed.

B. Generic Assessment Rubric (Illustrative)

Institutions adapt this rubric to each module, ensuring the descriptors are specific and observable. A student is certified on achieving at least the specific and observable. A student is certified on achieving at least the Competent level in every criterion.

Criterion	Needs Development	Competent	Proficient
Knowledge of core concepts	Major gaps; cannot apply concepts unaided	Applies core concepts with limited support	Applies concepts fluently in new situations
Practical execution	Fails to complete tasks safely or correctly	Completes standard tasks correctly	Completes complex tasks with quality and efficiency
Tools and equipment	Needs frequent guidance	Uses tools and equipment correctly	Optimises tool use and troubleshoots
Quality and safety	Does not meet quality or safety expectations	Meets documented quality and safety standards	Exceeds standards and models good practice
Reflection and improvement	Little reflection on own work	Reflects and makes reasonable improvements	Systematically improves performance over time

C. Minimum Requirements for Skill Development Centres

- A named coordinator with defined duties and adequate release time.
- A documented annual plan linking modules, student cohorts and industry partners.
- Appropriate space, equipment and safety provisions for the skill areas offered.
- At least one active industry or sector partnership per vocational pathway.
- Maintenance of a complete student skill record from enrolment through certification.
- An annual self-review and submission to the institution's academic council.

D. Annual Outcomes Reporting Table

Institutions report the following indicators to the Technical Education Department each year alongside the institution's annual report.

Indicator	Reporting Unit
Students enrolled in at least one skill module	Number and share of eligible students
Students who completed a foundational module	Number and pass rate
Students certified in a vocational pathway	Number by pathway
Certifications aligned to national skill qualifications	Number and share
Distinct industry partners engaged	Count and engagement type
Faculty trained for skill delivery	Number and share of delivery faculty
Placement or employment attributable to skill certification	Number and share (where traceable)

Indicator	Reporting Unit
Student satisfaction with skill modules	Average rating on standard survey

E. Reference to National Skill Qualifications

Where national skill qualifications exist for a domain, institutions must map module learning outcomes to the relevant competency band and indicate alignment in the module planning template. Institutions are encouraged to seek recognition of their certification through the national skill framework where eligible.
